Education

Independent University, Bangladesh (IUB)

Bachelor of Science in Computer Science and Engineering

Sep. 2022 – May 2026

Dhaka, Bangladesh

Dhaka College

Higher Secondary Certificate (HSC) GPA: 5.00

2018 – 2020

Dhaka, Bangladesh

Relevant Coursework

- Data Structures
- Algorithms
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Operating System
- Computer Architecture

Professional Summary

Computer Science and Engineering graduate with strong foundations in software development, backend technologies, and problem-solving. Proficient in Python, JavaScript, Node.js, Express.js, MongoDB, and SQL. Experienced in developing full-stack and backend-focused projects, including emergency response solutions. Passionate about building scalable applications, learning modern technologies, and solving algorithmic challenges. Seeking Software Engineer or Backend Developer opportunities where I can contribute technical expertise while continuing to grow professionally.

Projects

FastAid – First Responder Volunteer Network | *Node.js, Express.js, MongoDB, JavaScript*

January 2024

- Developed a platform connecting nearby first-aid volunteers with accident victims for faster emergency assistance.
- Designed volunteer registration and emergency response workflows.
- Implemented backend functionalities and database integration for volunteer management.
- Focused on improving accessibility and response efficiency during emergencies.

Ticket Price Calculator App | *Java, Android Studio*

November 2020

- Created an Android application using Java and Android Studio to calculate ticket prices for trips to museums in NYC.
- Processed user inputted information in the back-end of the app to return a subtotal price based on the tickets selected.
- Utilized the layout editor to create a UI for the application in order to allow different scenes to interact with each other.

Transaction Management GUI | *Java, Eclipse, JavaFX*

October 2020

- Designed a sample banking transaction system using Java to simulate the common functions of using a bank account.
- Used JavaFX to create a GUI that supports actions such as creating an account, deposit, withdraw, list all accounts, etc.
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

Technical Skills

Languages: Python, Java, C++, HTML/CSS, JavaScript

Developer Tools: VS Code, Android Studio, git, GitHub, Postman

Backend Development: Node.js, Express.js, REST API Development, JWT Authentication, MVC Architecture

Databases: Mongo DB, SQL, noSQL

Core Concepts: Object-Oriented Programming (OOP), Computer Networks, Problem Solving

Extracurricular

Certifications

2025

Cisco Networking Fundamentals

CISCO

- Networking Fundamentals
- Routing and Switching Basics

Additional Information

- Strong interest in Backend Development and Software Engineering.
- Passionate about learning new technologies and building practical software solutions.
- Open to Internship, Graduate Trainee, and Entry-Level Software Engineering opportunities.
